

## INNOVATE NZ 2009: Awards of Excellence Recipients

### SILVER AWARDS OF EXCELLENCE:

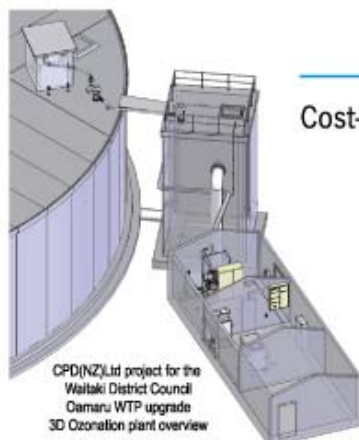

A Silver Award is judged to be of a higher standard than the Merit award. The project shows technical innovation, and provides above excellent service to the client.

### Oamaru Treatment Plant - Water Supply Upgrade by CPG (NZ) (formerly Duffill Watts) for Waitaki District Council

**Anthony Steel from CPG NZ and Martin Pacey from Waitaki District Council accepted the award.**

- Oamaru wanted to bring their water treatment station up to standard, and to solve a problem with poor taste and odour.
- CPG undertook considerable testing to determine the most appropriate and effective type of treatment
- Un-influenced by any particular supplier, they tested the options in the laboratory and in a pilot plant.
- They selected and installed a combination of membrane filter and ozone treatment.
- A report in the newspaper just this month announced that the city has been awarded a AA rating for their water supply.
- A thorough construction job and additional work by the council to clean the distribution system has resulted in excellent water quality for the Oamaru supply from this dedicated team.
